## UNITED STATES

### October Prices Received Index Down 0.2 Percent

The October Prices Received Index 2011 Base (Agricultural Production), at 88.8, decreased 0.2 percent from September but increased 3.3 percent from October 2019. At 87.7, the Crop Production Index is down 6.4 percent from last month but up 5.5 percent from October 2019. The Livestock Production Index, at 90.6, increased 7.7 percent from September, but is unchanged from October 2019. Producers received higher prices during October for milk, hogs, market eggs, and broilers but lower prices for potatoes, rice, dry beans, and sunflowers. In addition to prices, the indexes are influenced by the volume change of commodities producers market. In October, there was increased monthly movement for soybeans, corn, cotton, and calves and decreased marketing of cattle, milk, broilers, and grapes.

### October Prices Paid Index Up 0.7 Percent

The October Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 111.1, is up 0.7 percent from September 2020 and 0.6 percent from October 2019. Higher prices in October for complete feeds, feeder pigs, concentrates, and feed grains more than offset lower prices for diesel, other services, gasoline, and wage rates.
